Kevin Holm

Frontend Developer

PROFESSIONAL OBJECTIVE

As a self-taught developer, I am a results-driven training specialist making the shift to the tech industry. I thrive in fast-paced environments. I perform well under pressure and am excellent in both independent and collaborative settings. I am eager to contribute to innovative projects as I am adaptable and detail oriented.

Some Projects:

Ash Kennels
- A modern and responsive website for dog kennels that prioritises a user-friendly design. The site will highlight a diverse range of interactive services, providing a comprehensive platform for all dog-related needs.

Razor King
- A straightforward barber website with a strong emphasis on responsiveness, speed, and user-friendly navigation. The site will feature a fast and easy-to-use contact form, ensuring a great experience for visitors looking to get in touch.

Stronger Together
- Crafting a sleek and minimalistic website designed for a professional mentor, targeting prospective clients. The website is fully responsive, ensuring an optimal user experience across devices.

PROFESSIONAL EXPERIENCE

Foundever, Kingston - Learning Specialist
Dates of Employment: December 2020 - November 2024

- Managed the onboarding process for new hires, enhancing their time-to-productivity by 25%.
- Supported implementation of a learning management system (LMS) to our specific part of the business, streamlining the delivery and tracking of training materials.
- Reduced training costs by 15% through the introduction of a blended learning approach.

- Produced training and supportive materials tailored to organisational needs and partnered with client vendors to source specialised training programs.
